

SPECIALIST STORAGE

Committed to Excellence in Design, Quality, and Service.

A flexible approach to designing storage is essential to stay competitive and accommodate the unique needs of your customers. As a leading trade manufacturer, we understand that every project is different, with its own set of challenges and conditions. We specialise in designing customised storage solutions to suit any environment.

Dust-Proofing

Dust can be harmful and abrasive to delicate surfaces. We can apply airtight door seals to protect inventory from dust and other harmful environmental pollutants.

Airflow Regulation

Airflow regulation is essential for the preservation of valuable collections. Fluctuation in humidity or temperature can cause the deterioration of materials. We make perforated steel shelving and walls to allow enhanced air circulation.

White-Label Products

Our flexible manufacturing capabilities mean we can create bespoke products to the dimensions you need. We work with our customers to develop high-quality products, in keeping with your brand, and bring them to market. We're also happy to supply the products with your own branding.

Enhanced Security

Increase security of your storage with perforated steel doors which can be custom made to any size, either with your existing shelving or with our range of shelving.

Other Features

- Specially sized compartments to accommodate unique items
- Low level or high level storage
- Channels to divert water from inventory
- Raised bases to accommodate lifting and moving

Contact us on **0117 982 2882** or info@moduflex.co.uk to discuss your project.
Visit www.moduflex.co.uk for more information.

Systems are designed and manufactured in the UK, conforming to **ISO 9001** and **45001**. We also operate an environmental management system that complies with **ISO 14001**.

CASE STUDIES

Committed to Excellence in Design, Quality, and Service.

With our flexible manufacturing capabilities, we are able to support our customers with complex and specific storage requirements. Here are some examples of bespoke projects we've completed.

Medical Research Centre

This customer requested Stainless Steel mobile bases for their existing specialist racks which they could easily slide on and off. We installed medical-grade stainless bases in their lab that could easily be cleaned, with tracks in the floor to move the whole unit across the room, increasing available floor space..

Custom Made Storage

Bristol-based company Vertical Aerospace needed special storage for parts for their electric aircrafts, while saving space. We installed System R mobile bases with custom-made pull-out drawers to suit the customer's requirements so that the storage could be condensed down to increase valuable floorspace.

Bespoke Shelving

For this project, the customer wanted to fit additional shelving around their existing plan chests and low level cupboards. We made double skin shelving in custom sizes as per the customer's specifications to increase their storage capacity in the same floorspace.

Art Gallery Fitout

We completed a fitout for a local art gallery including pull-out art racks to fit around plan-chests. We installed specialist floor-mounted pull-out picture racking to enhance the aesthetic of the room. We also supplied desking and wall-mounted shelving as well as an extended viewing table with plan-chests stored underneath.

As an established trade manufacturer, we're proud to offer a wide range of specialist storage options tailored to meet the unique needs of our clients. We take the time to understand requirements and develop the best solution for you and your customers. We're always happy to help you kickstart a project, so get in touch with us today to request a quote!
